I think it would be good to CC Nicole as well.

No problem, should I still be including Nicole as well as the 2 of you?

Thanks, good to know. It seems that Kent's and his teams' needs may be evolving, or at minimum, they may be looking for some information sooner rather than later to inform their research planning. I will go ahead and set up something for early this week so we can all hear what the needs are.

Sorry about that. I'm a little in the dark also but we can work this out.

Jackie

Hi Jackie,

No, we are not included in the discussions with Kent Thomas and his science team. All we have for ORD's specific needs is the list of questions Kent shared earlier on.

**Subject:** RE: Do you think it is worth trying to set up a call soon with the rubber recycling group or with the 2 processors that seem to have a large part of the market on tire crumb?

Thanks, I got busy with Zika stuff but am back onto tire crumb. We can talk about setting up meetings with the 2 companies that I think may be pretty big for infill products Ex. 3 (CERCLA section 104(e)(7)(42 USC 9604(e)(7))). I'm not sure if you found any additional ones.

In the meantime, have you been included in any discussion with Kent Thomas and his science team? I keep getting asked for specific info. that you are collecting, without context. It occurs to me that maybe you all aren't being included in Kent's science meetings, where specific needs are coming up. I know I am not included. So we are all a bit in the dark on what he needs now.

Fred asked me to set up a meeting with us and Kent to discuss. But let me know what your involvement is with ORD, beside me. There may be a disconnect that we can easily fix, and that would make the process go a little more smoothly.

Hi Jackie,

We do not have information to share as of yet. Our contact for the [REDACTED] Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))]  
[REDACTED] Ex. 3 [CERCLA section 104(e)(7)(42 USC 9604(e)(7))]] We do have a meeting scheduled with Nancy Nord and her clients for March 22.

The meeting with [REDACTED] should be on April 7, but we don't have their confirmation yet. I think it would be useful to still have that meeting since in the [REDACTED] shared, I did not see how [REDACTED] deals with scrap tires - pre-consumer waste, nor the rejects, and whether those "new" tires are going toward crumb rubber, or are, perhaps, incorporated within a tire manufacturing closed-loop recycling process.

We could hurry up and schedule calls with some of the individual processors, but our initial idea was to hit the big associations first, such as the synthetic turf industry group represented by Nancy Nord, since they could give us access to a cross-cut of manufacturers and installers and answer several groups of questions at the same time. That said, I do not think we would be opposed to initiating something early next week with a smaller producer/recycler, too. Thoughts?

**Subject:** Do you think it is worth trying to set up a call soon with the rubber recycling group or with the 2 processors that seem to have a large part of the market on tire crumb?

I'm thinking that time is passing and we don't really have much info. to send to Kent and others who are designing the research. Do we have any summary yet on general tire crumb processing, or any summary of info. that could help?

I did send some published studies on potential constituents to Kent , but do we have any summary of info. to date that we could provide?

Also, now that we see the [REDACTED] slides that they used in California, do we think we will get anything more from them? If this is all that they have, do we (and they) think it will be useful to meet? And can we get the rubber recyclers scheduled soon for a call or meeting? They may have different information.

Thanks,

Jackie
